

Jackie's Story PSA (:30) 2

My name is Jackie. I'm a cervical cancer survivor, and I know how important the HPV vaccine series is for cancer prevention. I wish this vaccine had been around for me and believe me, I will get my daughter vaccinated on time. To protect our daughters from cervical cancer, we need to get them vaccinated when they are 11 or 12. So make an appointment today. HPV vaccine IS cancer prevention. A message from the CDC.
