

National Native HIV/AIDS Awareness Day PSA (:30)

On March twentieth, we recognize the impact of HIV/AIDS on American Indians, Alaska Natives, and Native Hawaiians through the observance of National Native HIV/AIDS Awareness Day.

We can limit the spread of this devastating disease among our country's Native peoples. Be a part of the solution; get tested for HIV. To find an HIV testing location near you, go to www.hivtest.org or text your zip Code to KNOW IT. That's 566948.

A message from CDC.
