

Recognizing and Preventing Whooping Cough (Pertussis) 2

This podcast is presented by the Centers for Disease Control and Prevention. CDC – safer, healthier people.

Pertussis, or whooping cough, is a very serious disease, especially for infants. It's often spread to babies from older kids or adults who may not even know they have it. Whooping cough is a real threat to your baby *today*. To stay protected, get your baby and *everyone* around your baby vaccinated. Vaccination is protection. Learn more at www.cdc.gov/pertussis.
