

## STD Awareness PSA – Male Announcer 1 (:30)

[Male Announcer] Did you know that many people who are infected with S-T-Ds show *no* symptoms? When left untreated, S-T-Ds can spread back and forth between partners. If *your* partner has recently been diagnosed with an S-T-D, make sure *you* get tested, too. Talk with your health care provider about S-T-Ds *and* testing.

Visit [G-Y-T-now-dot-org](http://G-Y-T-now-dot-org) to find an S-T-D testing location near you. Remember, *all* S-T-Ds are treatable and *most* are curable.

A message from C-D-C.
