

Shaken Baby Syndrome PSA (:30)

Nearly all victims of Shaken Baby Syndrome suffer serious health consequences and at least one out of every four babies who are violently shaken dies from this form of child abuse.

Anyone, from parents to caregivers to bystanders can do something to help. Tell everyone about the dangers of shaking a baby and what to do if they become angry, frustrated, or upset. Visit www.cdc.gov/injury to learn about Shaken Baby Syndrome and ways to prevent it.

A message from CDC.
