

National Women and Girls HIV/AIDS Awareness Day PSA (:30)

March 10 is National Women and Girls HIV/AIDS Awareness Day.

Women and girls aged 13 years and older made up nearly a quarter of those diagnosed with HIV in the U.S. in 2009.

One in five people who are infected don't even know it.

The first step to protecting yourself and others is to get tested.

To find a testing center near you, go to Hivtest.org or text your zip code to KNOW IT, that's 5-6-6-9-4-8.

A message from CDC.
